FULL MOUTH REHABILITATION

Clinical Updates

At **Impart Education** we constantly evolve our strategies in clinical practice to empower our participants to make independent, intelligent decisions in treatment planning and execution.

The vast, complex subject of Full Mouth Rehabilitation has evolved with time. Our goal is to make the process more robust in **diagnosis** of occlusal diseases, develop thorough **risk assessment** strategies and make treatment **sequencing** easy to grasp. That, along with choice of contemporary materials and **adhesive** dentistry makes the rehabs we do Esthetically, Functionally and Biologically superior.

Join us for a day to revisit that key points of this subject with fresh new case updates, break out sessions, ability to bring your own cases and get insights in the clinical dilemmas you face.

This **limited attendance program** is restricted only to the past participants of Impart Education, Full Mouth Rehabilitation Course.
